

Levy for market area conversion from L-Gas to H-Gas

Publication of the market area conversion levy

The market area conversion levy according to § 25 Terms and conditions for the entry and exit contract of § 10 KoV is calculated for each market area and applicable to all exit points in addition to the network fees. Against the backdrop of the expected legal change to § 19a of the EnWG with effect on 01.01.2017, the TSOs publish two levies: the market area specific levy and the nationwide market area conversion levy. The market area specific levy corresponds to the current legal situation with a tumbling of the costs within the market area and will be applied until the date of the statutory amendment of § 19a EnWG, which provides for the future a nationwide market area conversion levy. With the entry into force of this legal change nationwide market area conversion levy is applied and will replace the market area specific levy. The TSOs inform the customers immediately about the application of the nationwide market area conversion levy.
